THE CROSS-FUNCTIONAL WEB AVANT-GARDIST

During the first weeks as a **Betsson** employee I was told to choose a value word and thought pretty hard about it. Since I have a tendency to lean towards the borders of change '**avant-garde**' was picked, which signifies my mindset quite well.

It is easy to get caught up in buzzwords though and I'm working hard on catching up with the past too. The ambition is to be a truly **cross-functional web developer** in order to flow with ever changing situations you face as a web developer.
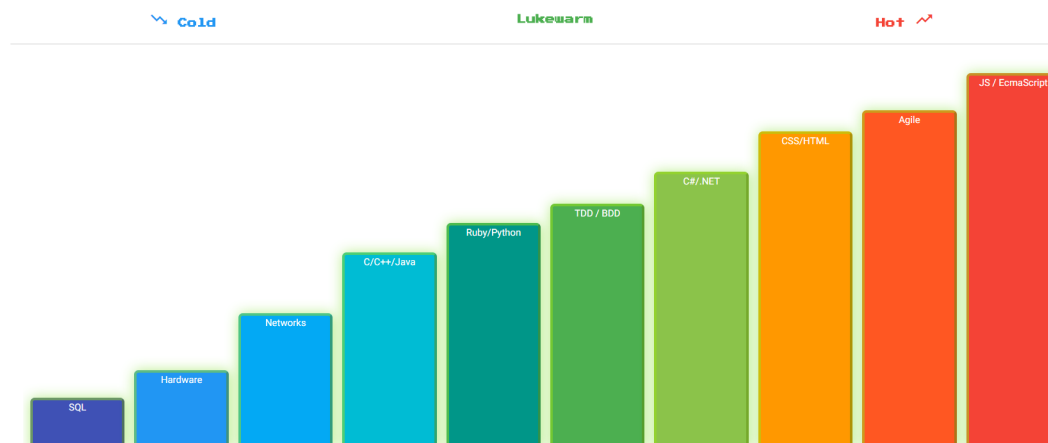

With a Bachelor degree in programming from **Linköping university** I went on to finish a thesis work at **Ericsson**. Since August 2014 I've been lucky enough to work for Betsson, which has turned out to be the perfect place to grow as a web developer in all regards.

My paradigm is '**Per Programming**' ...
